PROFESSIONAL SUMMARY

Early-career Full-Stack Software Engineer specializing in TypeScript, React, and NestJS. Builds React interfaces and back-end services with PostgreSQL, Prisma, REST APIs, gRPC, and Kafka; experienced with authentication, relational database design, and CI/CD. Brings frontend internship experience at TMA Solutions and backend training at FPT Software.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, C++, SQL
Frontend: React, Next.js, HTML5, CSS3, SCSS, Tailwind CSS, React Bootstrap
Backend: Node.js, NestJS, Express.js, REST APIs, gRPC, Kafka, JWT, RBAC
Databases: PostgreSQL, MySQL, Prisma, schema design, migrations
Testing: Jest, Playwright, React Testing Library, CodeQL
DevOps and Tools: Docker, GitHub Actions, GitLab CI/CD, Git, Postman

EXPERIENCE

FPT Software – Fresher Node.js Developer Apr 2026 – Present

- Collaborated in a 3-developer Scrum team on a 13-service coffee-franchise supply-chain mock project, focusing on NestJS APIs and PostgreSQL/Prisma data models.
- Implemented backend business logic, request validation, and database transactions; worked with Jest, Docker, and GitLab CI/CD during the training program.

CT Group Hi-Tech – Technology & Product Division Staff Sep 2025 – Feb 2026

- Designed UAV data flows and architectures for analysis and visualization use cases; translated operational and regulatory requirements into technical specifications for cross-team reviews.

TMA Solutions – Front-end Developer Intern Sep 2023 – Dec 2023

- Built and maintained responsive React interfaces, resolved frontend defects, and contributed to page-load performance and accessibility improvements.

PROJECTS

eCoffee – Coffee Franchise Supply Chain Platform Live Demo

FPT Software Mock Project

Technologies: React, TypeScript, NestJS, PostgreSQL, Prisma, Microservices, gRPC, Kafka, Redis, Docker, Nx, GitLab CI/CD

- Developed 4 backend microservices (Warehouse, Inventory, Supplier, and Franchise) within a 13-service architecture.
- Implemented gRPC service communication and Kafka event workflows for asynchronous data exchange across the four services.

Digital-E System – Full-Stack E-commerce Platform Live Demo | GitHub

University Graduation Project

Technologies: React, TypeScript, NestJS, MySQL, Prisma, Tailwind CSS, Firebase Auth, Docker, GitHub Actions

- Continue to maintain and extend the project independently, with product discovery, checkout, order management, inventory tracking, and administrative workflows.
- Integrated 2 payment methods (PayOS and cash on delivery), including webhook verification and inventory reservations to support order and stock consistency during checkout.

Food Recipes – Full-Stack Recipe and Meal Planning Platform Live Demo | GitHub

TMA Solutions Internship Mock Project

Technologies: React, TypeScript, NestJS, PostgreSQL, Prisma, Redux Toolkit, TanStack Query, Docker

- The current version includes 3 interconnected workflows for meal planning, shopping lists, and pantry management, built with React and TanStack Query.
- Implemented NestJS REST APIs with JWT authentication, refresh-token rotation, and role-based authorization to support secure application access.

EDUCATION

Ho Chi Minh City University of Technology (HCMUT) Ho Chi Minh City, Vietnam
M.Sc. in Computer Science (in progress) Sep 2026 – Present
B.Sc. in Computer Science, English Program Sep 2020 – Nov 2024

CERTIFICATIONS

IELTS 7.0 (Apr 2026)
Meta Professional Certificates: Front-End, Back-End, and Full Stack (2026)
